Leslie, yes the START project is for the same site. The Maryland location may be the same company but it is a different location.

Subject: Miller Chemical

Greg,

I pulling together costs for the Miller Chemical Site and have a question for you. The Miller Chemical site, A34B, is located at 120 Radio Road, Hanover, PA. On the START invoices the site is called, "Miller Chemical Homewell Sampling ER." Is this the same site?

There's another site with a similar name, Miller Chemical & Fertilizer Corp., located at Routes 136 & 135, Harford Co., Whiteford, MD. Is this a separate site?

Thanks for any help that you can provide.

Leslie
